

- **April 1997 - First engineering flights**
- **August 1997 - First successful imaging flight over Moffett Field**
- **November 1997 - First vicarious calibration experiment.**
 - **Paper discussing results “Vicarious Calibration of the Multi-angle Imaging SpectroRadiometer (MISR)” submitted to 1999 Conference on Characterization and Radiometric Calibration for Remote Sensing**
- **March 1998 - Successful flight over JPL**
- **May/June 1998 - 8 successful flights during FIRE III campaign**
- **December 1998 - Verified AirMISR hardware modifications**
 - **Successful flight over JPL**
 - **Vicarious calibration experiment over Roger’s Lake with complete ground-based instrumentation**
